TECHNICAL SKILLS

- C, Python, OOP, HTML
- Django, Django Rest Framework, Fast API
- PostgreSQL, MySQL, SQLite, MongoDB
- Design Pattern, Architecte
- AWS, Git, GitHub, Docker
- Data Structure & Algorithm
- API Integration, LLMS
- Software Analysis
- Vibe Coding

PERSONAL SKILLS

- Problem Solving, Presentation, Flexibility
 - Time management, Teamwork, Dependability
-

EXPERIENCE

Backend Engineer at Eram Group

Jun 2025 - Present

- Designed a comprehensive admin panel with role-based access control using Django, improving operational efficiency by 40%.
- Optimized Django/PostgreSQL backend for 4.5K+ users with 30% faster response.
- Integrated SMS for secure OTP authentication
- Implemented Tap and Paymob payment gateways for efficient transactions.
- Connected ERPNext, Amazon, Noon, and Sala Ecommerce for better operations.
- Applied expertise in healthcare, drinks, and e-commerce to develop customized solutions.
- Documented APIs for developer clarity and usability.
- Built secure authentication with OAuth2, JWT, and OTP phone verification for user login and account management.

Python Developer • Upwork Freelance

Mar 2022 – 2024

- Managed full project life cycles, collaborating with clients on platforms like Upwork, ensuring successful delivery of projects within deadlines.
- Developed and optimized e-commerce, CRM, and LMS platforms, improving system performance by 20% and boosting engagement by 25%.
- Built and integrated scalable APIs with Django Rest Framework (DRF) to ensure seamless front-end and back-end communication.
- Designed and deployed email automation systems handling 1M+ messages, increasing outreach efficiency by 70%.

- Created and managed my YouTube channel called “**bitwize**” dedicated to teaching Django, sharing tutorials, and building practical projects to help others learn and grow their backend development skills.
-

PROJECTS

E-commerce Platform & App • Weem

- Full-featured cart, coupons, secure payments, order management, reviews, analytics, ERP integration, promo codes.

Home Service App

- Home Service app connects users with trusted professionals for cleaning, maintenance.

Eramex Platform & App

- Eram EX app seamlessly connects customers with shipping providers in Saudi Arabia, Egypt, and Gulf countries. Real-time rates, multi-carrier support, tracking, and smooth booking flows.

Social Media Backend

- Feeds, follows, multimedia posts, likes, comments, privacy, full-text search.

E-commerce Dashboard

- Unfold Admin, analytics, products & orders, exports, filters, role-based access.

Real Time Chat

- WebSocket chat with presence, typing indicators, push notifications.
